WORK EXPERIENCE

August 2023 - December 2024

Product Designer - Munich, Germany

- Epilot
- Epilot is a scale-up B2B and B2C cloud SaaS in the renewable energy sector. While here, I was a member of the the design team working cross-functionally to deliver solutions for the platform and our customers. Some highlights from my time working at Epilot include:
- Designed illustrations for a white-label product which enabled energy clients to improve their customer acquisition. The success of the MVP resulted in further investment in the white-label product.
 - Worked cross functionally to help design a data table with filterable options, directly improving how businesses managed their workflows within the cloud platform.
 - Designed and created a white-label low-code tool for energy companies to improve their customer acquisition and satisfaction.
 - Streamlined the customer journey of the grid sign-up process within a cloud-based B2B software environment.
 - Worked collaboratively to plan and run user testing sessions to gather insights and refine design solutions, demonstrating a focus on B2B and B2C user needs.

July 2023 - August 2023

Freelance Designer

As a freelance designer, my main project was the redesign of a Munich-based business coaching site. The project aimed to create a more streamlined experience with a focus on improving information architecture and brand presentation. The final design was very successful in achieving these goals and led to a higher rate of customer inquiries.

May 2022 - July 2023

Relocation to Europe, Travel, and Further Study

During this time period I relocated to Germany, travelled, and completed a full time course with Career Foundry to progress my career, later leading to a job in Product Design.

July 2021 - April 2022

Learning Experience Designer - Sydney, Australia

Employer's Mutual Limited

When I began my role in the Learning Design team there was an issue with staff attrition. My role as a Learning Designer involved

- Collaborated within a team to redesign and develop a 12-week onboarding program, contributing user-centred design skills to re-brand internal communications. Our impactful design work, resulting from cross-functional input, resulted in a nomination from the Personal Injury Education Foundation
- Presented and briefed with company executives to update on progress of training overhaul throughout re-design process
- User-centred re-design led to improved retention rates of staff.

April 2019 - July 2021

Injury Management Advisor - Newcastle, Australia

Employer's Mutual Limited
